## Process overview

Question	Answer	More details and to go further
<p> <b>What are the objectives of reviewing specifications?</b></p>	<p>Ensure specifications delivery is</p> <ul style="list-style-type: none"> <li>• Of good quality           <ul style="list-style-type: none"> <li>◦ easy to find and use</li> <li>◦ following specifications guidelines ( <a href="#">Amadeus specifications guidelines</a> and additional relevant local guidelines if applicable)</li> <li>◦ understandable</li> <li>◦ complete and accurate, with only relevant information</li> </ul> </li> <li>• Fully integrated and harmonized within the existing specifications           <ul style="list-style-type: none"> <li>◦ describing a solution coherent with the rest of the product</li> <li>◦ aligned with business requirement and designed</li> </ul> </li> </ul>	<p>Appropriate solution should have been checked at solution design time, but still specifications review acts as a gate keeper.</p>

	<p>solution</p> <ul style="list-style-type: none"> <li>◦ not over-engineered</li> <li>◦ not going against product vision</li> </ul>	
<p><b>+ What are the benefits of specifications review?</b></p>	<ul style="list-style-type: none"> <li>• Learning opportunity for PDA writer and reviewer to grow, learn and improve in specifications writing.</li> <li>• For reviewer, opportunity to discover new functionalities.</li> <li>• For all, opportunity to suggest updates to specifications guidelines.</li> </ul>	<ul style="list-style-type: none"> <li>• Following these guidelines should help avoid common pain points of specifications review (delays, frustration, friction, low quality, waste of time)</li> </ul>
<p><b>? Which specifications updates are reviewed?</b></p>	<p>Any update or creation of new functional specifications that is not just a typo or formatting.</p>	<ul style="list-style-type: none"> <li>• Sometimes it is useful to split the review into several smaller reviews.</li> <li>• Different functionalities shouldn't be grouped into a same review.</li> <li>• The writer should inform reviewers about what needs to be reviewed. <ul style="list-style-type: none"> <li>◦ The writer should clearly state whether the reviewer should check only the updates or the entire document.</li> <li>◦ Some examples when reviewing only the updates: <ul style="list-style-type: none"> <li>▪ Describe the changes in detail in the request for review: <ul style="list-style-type: none"> <li>• Provide the list of chapters/paragraphs modified</li> </ul> </li> </ul> </li> </ul> </li> </ul>

		<ul style="list-style-type: none"> <li>• Provide a screenshot of the changes</li> <li>▪ Highlight it using specific formatting in the specifications itself ( ⚠️ A strong process is needed to remove highlights at the end of the review)</li> <li>▪ In Confluence, provide the link of the version comparison.</li> <li>▪ In specifications as code, it is the diff of your pull request.</li> </ul>
🕒 <b>When is specifications review done?</b>	<ul style="list-style-type: none"> <li>• When writer requests the review <ul style="list-style-type: none"> <li>◦ writer has finished writing specifications</li> <li>◦ writer has done a self review</li> </ul> </li> <li>• It is possible to provide feedback on existing specifications at any time</li> <li>• It is recommended to have a periodical review of the full specifications to ensure that the documentation is still aligned with the product</li> </ul>	<ul style="list-style-type: none"> <li>• Writer can request <ul style="list-style-type: none"> <li>◦ design and structure advice before starting writing specifications</li> <li>◦ intermediate specifications review if relevant (for example if some information are missing to write some parts)</li> </ul> </li> <li>• See <a href="#">IP weeks &amp; enablers - PD</a> <a href="#">A recommended activities</a> for good practice to handle the feedback on existing specifications</li> </ul>
👤 <b>Who reviews the specifications?</b>	<ul style="list-style-type: none"> <li>• Mandatory <ul style="list-style-type: none"> <li>◦ Self review</li> <li>◦ Agile team review <ul style="list-style-type: none"> <li>▪ 1 developer (DEV)</li> <li>▪ 1 quality engineer (QA)</li> </ul> </li> <li>◦ 1 product definition analyst (PDA) review</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• PDA reviewer is ideally in the same Agile team as the writer, else in the same train, line team or department</li> <li>• Component team reviewer is ideally a PDA</li> <li>• It is possible to</li> </ul>

	<ul style="list-style-type: none"> <li>◦ 1 component team review</li> <li>• Recommended             <ul style="list-style-type: none"> <li>◦ product manager/product owner/epic owner</li> </ul> </li> <li>• Optional             <ul style="list-style-type: none"> <li>◦ more product analysts, developers, quality engineers</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>◦ get PDA and component team review at the same time if specifications gets reviewed by a PDA from component team.</li> <li>◦ get component team review at the same time as Agile team review if reviewers in the Agile team are also members of the component team</li> </ul>
<p>👤 <b>What are the responsibilities of each specifications review stakeholder?</b></p>	<ul style="list-style-type: none"> <li>• The writer: the person updating specifications, ideally a PDA, must             <ul style="list-style-type: none"> <li>◦ respect <a href="#">Amadeus specifications guidelines</a></li> <li>◦ ensure specifications are in line with initial (customer) requirement definition</li> <li>◦ request specifications review, and provide the details of what is to be reviewed</li> <li>◦ ensure specifications gets reviewed and approved</li> </ul> </li> <li>• Any reviewer             <ul style="list-style-type: none"> <li>◦ ensure specifications is free of typo, understandable, accurate, complete and well integrated with the rest</li> <li>◦ ensure the specifications content is in line with their understanding of the need and of the product</li> </ul> </li> <li>• DEV and QA reviewers from the Agile team:             <ul style="list-style-type: none"> <li>◦ ensure that the code and the tested behavior are or will be</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• Product Managers/Product Owner/Epic Owner are recommended and not mandatory because:             <ul style="list-style-type: none"> <li>◦ some specifications (internal applications of Amadeus) are not relevant for them.</li> <li>◦ PMs perform a review of the solution in previous steps of the process (like HLS/HLD) and they ensure at this time that the product delivered is aligned with original requirements.</li> </ul> </li> </ul>

aligned with specifications

- PDA reviewer:
  - ensure the quality and compliance of the specifications with the guidelines outlined at [Ama](#)  
[deus specifications guidelin](#)  
[es](#)
- Specifications/component team owners:
  - ensure that the solution aligns with the overall product vision.
  - ensure that any applicable internal guidelines are followed.
  - ensure specifications are in line with initial (customer) requirement definition

**1234 What is the sequence of mandatory specifications reviews?**

1. Self specifications review
2. PDA review and Agile team review
3. Component team review

- Do not proceed to the next review until all comments from the current step have been addressed and approval has been obtained.
- If the PDA writing the specifications isn't very experienced, it's recommended to have the PDA review done before the DEV and QA team review.
- If the specifications writer is an experienced PDA, it's recommended to get feedback from DEV and QA before the PDA peer review.

**How to request a specifications review?**

- For Agile team review, Agile team is self organized
- For PDA review either apply the existing guidelines or find the appropriate point of contact in the line or agile organization
- For component team review, each component team must define the process to communicate when the specifications are ready to be reviewed.

- For Agile team review, usually specifications review request is done by
  - requesting it in daily
  - or assigning Jira ticket to reviewers
  - or creating sub-tasks for review
  - or workflows in Confluence
  - or pull request in specifications as code
- For PDA review:
  - apply the guidelines of:
    - the organization responsible for the product or
    - the organization of the (agile/line) to which the PDA belongs

		<ul style="list-style-type: none"> <li>◦ if no guideline is available the writer contacts a PDA in the <i>same</i> Agile team or <i>ask</i> Agile or line organization which PDA to involve</li> <li>• For component team review, specifications review request can be done via <ul style="list-style-type: none"> <li>◦ Teams chat</li> <li>◦ Confluence page</li> <li>◦ E-mail</li> <li>◦ pull request in specifications as code</li> <li>◦ ...</li> </ul> </li> </ul>
<p>😊 <b>How to provide specifications review feedback?</b></p>	<ul style="list-style-type: none"> <li>• Review is a priority: perform the review as soon as possible, be responsive.</li> <li>• ✔ Dos <ul style="list-style-type: none"> <li>◦ Be constructive and polite</li> <li>◦ Use inline comments</li> <li>◦ Give reasoning, if applicable, by referring to <a href="#">Amadeus specifications guidelines</a></li> <li>◦ Consider the possibility to suggest/propose alternatives with its reasoning</li> <li>◦ Flag optional comments</li> <li>◦ Appreciate good things</li> <li>◦ Consider calling the writer to avoid iterative comments and misunderstanding</li> </ul> </li> <li>• ✖ Don't <ul style="list-style-type: none"> <li>◦ Don't over-comment (over style, every punctuation, ...)</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• Review should be provided ideally the next day, at maximum within one week.</li> <li>• Use “we“ instead of “you“</li> <li>• Use questions instead of negations</li> <li>• Use labels to identify the type of comment (suggestion, question, blocking, non-blocking)</li> </ul> <p>Example of feedback:</p> <ul style="list-style-type: none"> <li>✔ Good comments <ul style="list-style-type: none"> <li>• “Please use active voice as recommended in B.3 of <a href="#">Amadeus specifications guidelines</a> (comment applicable in several places of this specifications)”</li> <li>• “I am not sure if the behavior is this or that? Please reformulate the specifications to make it clearer if it is behavior x or y.”</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>◦ Don't update the specifications by yourself</li> </ul>	<ul style="list-style-type: none"> <li>• "What about this alternative text: "blah blah" with shorter sentence(s) easier to understand/read?"</li> <li>• "Great! This diagram explains well the process"</li> <li>• <b>"issue (non-blocking):</b> These buttons should be red, but let's handle this in a follow-up."</li> <li>✖ Poor comments <ul style="list-style-type: none"> <li>• "Reformulate"</li> <li>• "Not clear"</li> </ul> </li> </ul>
📁 How to receive specifications review feedback?	<ul style="list-style-type: none"> <li>• Handling of comments is a priority: do it as soon as possible, be responsive.</li> <li>• Feedback is a gift: reviewer took time to review and is committed to specifications quality</li> <li>• Consider if a comment applies to other places in the specifications than the place it has been made</li> <li>• Make sure to address all comments</li> <li>• When needed clarify directly in the specifications. You don't need to do it in the comment.</li> <li>• Do not hesitate to contact reviewer if a comment is not clear or if you are not sure about the comment validity</li> </ul>	<ul style="list-style-type: none"> <li>• Handling of comments should be done ideally the next day, at maximum within one week.</li> <li>• In Confluence <ul style="list-style-type: none"> <li>◦ Writer notifies reviewer that comments have been handled</li> <li>◦ Reviewer resolves the comments if satisfied with the changes, else reply to the comment explaining what is missing</li> <li>◦ Writer is responsible for ensuring reviewers resolve all their comments</li> </ul> </li> </ul>
✅ When is a specifications review finished?	<ul style="list-style-type: none"> <li>• When all review comments have been handled</li> </ul>	<ul style="list-style-type: none"> <li>• In Confluence, review comments handled mean</li> </ul>

	<ul style="list-style-type: none"> <li>When all reviewers have given their approval on the last specifications version</li> </ul>	<ul style="list-style-type: none"> <li>inline comments related to the update are resolved</li> <li>bottom page comments are deleted</li> <li>In specifications as code, pull request is merged</li> </ul>
<p> <b>How to integrate specifications review process in Agile team process?</b></p>	<p>Definition of done must contain:</p> <ul style="list-style-type: none"> <li>Specifications written/updated</li> <li>Agile team specifications review done</li> <li>PDA review done</li> <li>Component team review requested (or done*)</li> </ul> <p>A task must be created to ensure that when component team review is done, comments are handled and specifications get final approval.</p>	<p>* How to decide if the component team review should be “<b>done</b>” or “<b>requested</b>”:</p> <ul style="list-style-type: none"> <li>"Component team review <b>done</b>": the component team is part of the Agile team so there is no external dependency</li> <li>“Component team review <b>requested</b>”: to avoid any risk of external dependency blocking the team</li> </ul>
<p> <b>What are the best practices for the component team specifications review process?</b></p>	<ul style="list-style-type: none"> <li>The owners of the component team specifications: <ul style="list-style-type: none"> <li>define the specifications review process</li> <li>track the requested reviews (target date, assignee, status, ...)</li> </ul> </li> <li>The component team specifications review guidelines/process: <ul style="list-style-type: none"> <li>are in line with <a href="#">Amadeus specifications review guidelines</a></li> <li>explain clearly how to request component team review</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>specifications review guidelines can be integrated into the specifications guidelines</li> <li>Examples of questions to answer in the specifications review guidelines: <ul style="list-style-type: none"> <li>how to request the review?</li> <li>how many reviewers are needed?</li> <li>what are the prerequisites?</li> <li>...</li> </ul> </li> <li>Example to ensure the review process is easy to find: <ul style="list-style-type: none"> <li>follow <a href="#">Specifications - welcoming page template</a> from <a href="#">Documentation guidelines ap</a></li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>◦ are easy to find, clear, easy to follow</li> </ul>	<p><a href="#">plied to Confluence spaces</a></p> <p>to provide easy access to specifications (review) guideline</p> <ul style="list-style-type: none"> <li>◦ add the link to the guidelines as a shortcut of the space</li> <li>◦ reference the specifications (review) guideline in the header/footer of the space</li> </ul>
<p> <b>Which tools are recommended for specifications review?</b></p>	<ul style="list-style-type: none"> <li>• Use <a href="#">Amadeus specifications guidelines</a> and local specifications guidelines (if any)</li> <li>• if in Confluence, what is practical for review is:             <ul style="list-style-type: none"> <li>◦ inline comments</li> <li>◦ possibility to define a review workflow in “Comala”</li> </ul> </li> <li>• If in “specifications as code”, what is practical for review is:             <ul style="list-style-type: none"> <li>◦ gathering of changes in a pull request</li> <li>◦ blocking comments</li> <li>◦ to get notified when a reviewer has finished to review your specifications (be it with or without comments)</li> <li>◦ possibility of adding automatic checks on specifications text</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• It is possible to create a review checklist to assist reviewers             <ul style="list-style-type: none"> <li>◦ with first check being following <a href="#">Amadeus specifications guidelines</a></li> </ul> </li> </ul>
